

# Carving A Roughout

## PROJECT PLANS

**Skill Level:** Beginner

## Materials

Item	Qty
Wooden Rhino Roughout	1
Beeswax	1
Straight Chisel Blade	1
Sanding Mandrel	1
Sanding Bands	1

## Toolbox

USB Lithium  
Power Carver

USB Lithium  
Rotary Tool

27 PC.  
Sanding and  
Grinding Kit

Black Fine Point  
Permanent  
Workshop Marker

## Project Instructions

### Step 1

Use a marker to draw a line down the middle of the rhino.

### Step 2

Insert the straight chisel blade into the USB lithium power carver. Begin shaping the rhino, carving out small pieces of wood at a time to help shape and round out the body of the rhino. Continue removing and shaping until satisfied with the shape.

### Step 3

Insert the sanding mandrel with the sanding band into the USB lithium rotary tool. Start with a lower grit, then work up to a higher sanding grit. Sand the rhino all over until all of the ridges are smoothed out. Coat the rhino in beeswax to protect the wood overtime.
